49. A method for verifying the presence of red eye in an image,  
said method comprising the steps of:  
providing image data representative of the image;  
processing the image data with a red eye detection algorithm for  
generating red eye signals indicating the presence of red eye in the image; and  
corroborating the existence of red eye by utilizing a face detection  
algorithm to verify that the red eye signals correspond to the presence of one or  
more faces in the image.

50. The method as claimed in claim 49 further comprising the  
step of correcting the red eye in the image.

51. A computer program product for verifying the presence of  
red eye in an image signal representative of an image, said computer program
